Call for Applications

Undergraduate Fellowships
Department of Computer Science

The Institute for Personal Robots in Education (IPRE) is a National Science Foundation (NSF) funded project involving a collaboration with computer scientists from Bryn Mawr College and Georgia Institute of Technology. IPRE’s mission is to create innovation in the teaching of introductory courses in computer science through the use of modern and novel technologies (like personal robots, creative media, etc.). Fellowships come with stipends and require awardees to participate in all IPRE-related activities and events.

Eligibility: Undergraduate Computer Science Majors with demonstrated excellence and initiative.

Terms: One year fellowships with a stipend of $4000
