

Call for Applications

2012 Undergraduate Fellowships Center for Science of Information

The Center for Science of Information is a NSF funded Science and Technology Center involving a collaboration with computer scientists, mathematicians, economists, neuroscientists, biologists and other scientists from **Bryn Mawr College**, Howard University, Massachusetts Institute of Technology, Princeton University, Purdue University, Stanford University, University of California-Berkeley, University of California-San Diego, University of Illinois. Our mission is to advance science and technology through a new quantitative understanding of the representation, communication, and processing of information in biological, physical, social, and engineered systems. Fellowships come with stipends and require awardees to participate in all Center-related activities and events.

Eligibility: Undergraduates with Junior/Senior standing in any major and additionally minor/major in Computer Science who have an active interest in applying computing and computational modeling to their own major as well as interest in studying and pursuing higher studies in the emerging science of information.

Terms: One year fellowships with a stipend of \$4000
