CMSC110: Introduction to Computing
 Fall 2014

Course Website: <http://cs.brynmawr.edu/Courses/cs110/fall2014sck/>
Instructor:
 Sonu Chopra Khullar, (schopra@cs.brynmawr.edu or sonukhullar.bmc@gmail.com)

Lectures
 Mon/Weds 11:40p to 1p in Park 278

TA-Support
 >20 hrs/week in Park 231

Labs when I will be present (Optional)
 Weds 2:30pm to 4:30pm in Park 231

Office Hours:
 Mon/Weds 10am-11am in Park 231 or by appointment

Grading

• 7 Assignments	56%
• In-class Quizzes	4%
• Exam 1	18%
• Exam 2	26%
Total	100%

Cutting Edge Computer Science

Google's Autonomous Car

- Nevada made it legal for autonomous cars to drive on roads on March 1, 2012
- California, Florida, and Michigan as well by 12/2013

Google Driverless Car May 2014

- If video doesn't play, click here:
<https://www.youtube.com/watch?v=CqSDWoAhvLU>

2011 Jeopardy!

- In February 2011, IBM Watson bested Brad Rutter (biggest all-time money winner) and Ken Jennings (longest winning streak)
- IBM is currently applying Watson's technology to medical diagnosis and legal research

Areas in Computer Science

 Artificial Intelligence	 Robotics	 Human-Computer Interaction	 Computer Graphics	 Computer Vision
 Operating Systems	 Computer Networking	 Databases	 Computer Security	 Ubiquitous Computing

GXK2013 20

What is Computer Science?

Computer science is the study of solving problems using computation

- Computers are part of it, but the emphasis is on the problem solving aspect

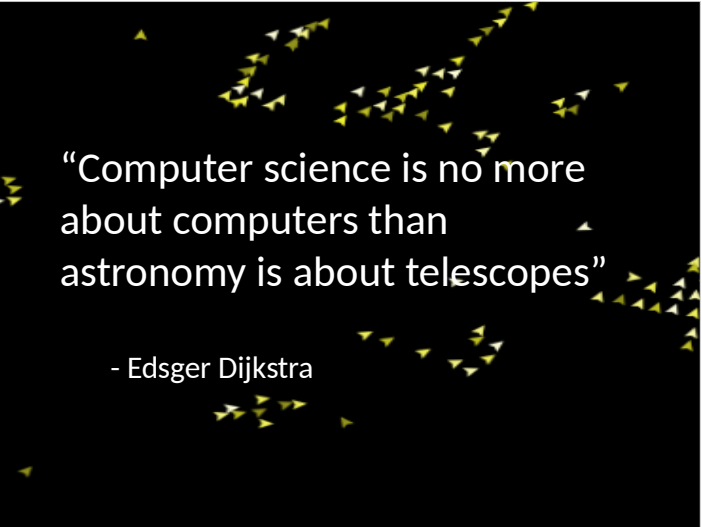

Computer scientists work across disciplines:

- Mathematics
- Biology (bioinformatics)
- Chemistry
- Physics
- Geology
- Geoscience
- Archaeology

GXK2013 21

“Computer science is no more about computers than astronomy is about telescopes”

- Edsger Dijkstra

Crowd Sourcing and 2013 App Of The Year

Mobile and Language Teaching

A Local Success Story (Penn Undergrads)

A smarter, more efficient way to buy media

Important Announcement: DoubleClick Bid Manager, our next generation DSP, is now launching. Many Invite Media customers have already been upgraded to DoubleClick Bid Manager and the rest will migrate over in the coming months. Please visit www.doubleclick.com/bidmanager for more information about the new features and capabilities available only through DoubleClick Bid Manager.

Contact Sales

Sign in to your account

Invite Media is a high impact demand-side platform that enables advertisers, agencies and agency trading desks to use real-time bidding to buy and optimize online media.

Buyers can use Invite Media's technology to set up and manage automated strategies to help facilitate intelligent buying across all major sources of real-time bidded inventory, all in a single interface. With the ability to apply data from any major source, plus the freedom to create business rules for bidding and optimization, Invite Media gives buyers flexible control over campaign performance.

Top agencies and advertisers rely on Invite Media's transparent universal buying platform, Bid Manager, to use their own and third-party data while gaining efficiency and scale from an integrated workflow and reporting system.

Now backed by Google's global infrastructure, Invite Media provides the reach, scale and speed buyers need to get optimal results.

With Invite Media, you can:

- Connect with your precise audience wherever they are
- Gain full visibility into all costs and sites in your buys
- Set global controls such as universal frequency capping for de-duplicated reach
- Use real-time reporting to gain greater insights into your campaigns and customers
- Streamline your workflow with a platform designed for speed and efficiency

Introduction to ^{Creative} Computing

GXK2013

27

Algorithms

An **algorithm** is an effective method for solving a problem expressed as a finite sequence of instructions. For example,

Put on shoes
left sock
right sock
left shoe
right shoe

GXK2013

28

Programming = Writing Apps

Programming is the process of designing, writing, testing, debugging / troubleshooting, and maintaining the source code of computer programs. This source code is written in a programming language.

GXK2013

29

A program

```
int areaOfCircle(int radius){  
    return PI*radius*radius;  
}  
  
r = 10;  
area = areaOfCircle(r);
```

GXK2013

30

Programming Languages

Processing	Python	Lisp
<pre>int areaOfCircle(int radius){ return PI*radius*radius; } r = 10; area = areaOfCircle(r);</pre>	<pre>def areaOfCircle(radius): return PI*radius*radius; r = 10 area = areaOfCircle(r)</pre>	<pre>(defun areaOfCircle (radius) (return (* PI radius radius))) (setq r 10) (setq area (areaOfCircle r))</pre>

A more interesting program...

```
Eye e1, e2, e3, e4, e5;
void setup()
{
  size(200, 200);
  smooth();
  noStroke();
  e1 = new Eye( 50, 16, 80);
  e2 = new Eye( 64, 85, 40);
  e3 = new Eye( 90, 200, 120);
  e4 = new Eye(150, 44, 40);
  e5 = new Eye(175, 120, 80);
  // setup()
}

void draw()
{
  background(102);

  e1.update(mouseX, mouseY);
  e2.update(mouseX, mouseY);
  e3.update(mouseX, mouseY);
  e4.update(mouseX, mouseY);
  e5.update(mouseX, mouseY);

  e1.display();
  e2.display();
  e3.display();
  e4.display();
  e5.display();
  // draw()
}

class Eye
{
  int ex, ey;
  int size;
  float angle = 0.0;

  Eye(int x, int y, int s) {
    ex = x;
    ey = y;
    size = s;
  } // Eye()

  void update(int mx, int my) {
    angle = atan2(my-ey, mx-ex);
  } // update()

  void display() {
    pushMatrix();
    translate(ex, ey);
    fill(255);
    ellipse(0, 0, size, size);
    rotate(angle);
    fill(153);
    ellipse(size/4, 0, size/2, size/2);
    popMatrix();
  } // display()
} // class Eye
```

Our Goal

- Use computing to realize works of art
- Explore new metaphors from computing: images, animation, interactivity, visualizations
- Learn the basics of computing
- Have fun doing all of the above!

Abstract Art

GKX2013

Summertime

Summertime.
And the livin' is easy
Fish are jumpin'
And the cotton is high

Your daddy's rich
And your mamma's good lookin'
So hush little baby
Don't you cry

One of these mornings
You're going to rise up singing
Then you'll spread your wings
And you'll take to the sky

But till that morning
There's a'nothing can harm you
With daddy and mamma standing by

Summertime.
And the livin' is easy
Fish are jumpin'
And the cotton is high

Your daddy's rich
And your mamma's good lookin'
So hush little baby
Don't you cry

45

Our Goal

- Use computing to realize works of art
- Explore new metaphors from computing: images, animation, interactivity, visualizations
- Learn the basics of computing
- Have fun doing all of the above!

GXK2013

46

Let's get started...

GXK2013

47

Administrivia

Software

Processing 2.X

- Already installed in the CS Lab
- Also available for your own computer @ www.processing.org
- Processing == Java

Book

Creative Coding & Generative Art in Processing 2
by Ira Greenberg, Dianna Xu, Deepak Kumar,
friendsofEd/APress, 2013. Available at the Campus
Bookstore or amazon.com or other vendors.

GXK2013

48

Homework

- Go to the CS Computer Lab (Room 231 PSB)
- Log in
- Start the Processing application (Make sure it is Version 2.x)
- In a web browser, go to the Tutorials section of processing.org

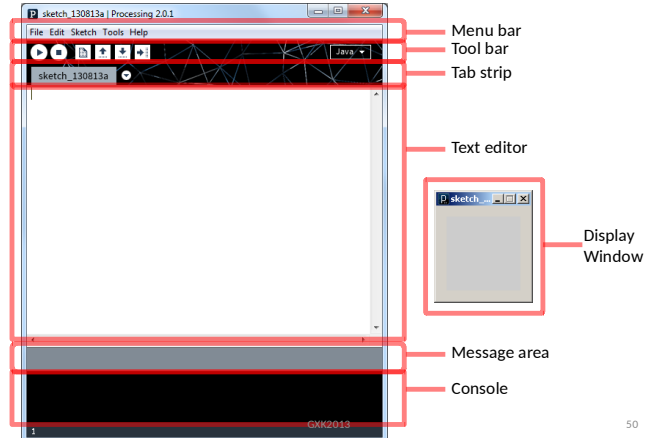

<http://www.processing.org/tutorials/gettingstarted/>

- Read the Getting Started tutorial (by Casey Reas & Ben Fry) and try out the two examples of simple Processing programs presented there
- If you'd like, install Processing 2.x on your own computer
- Read Chapter 1 (Read pages 1-12, skim 12-32)

GJK2013

49

Processing 2.0 IDE

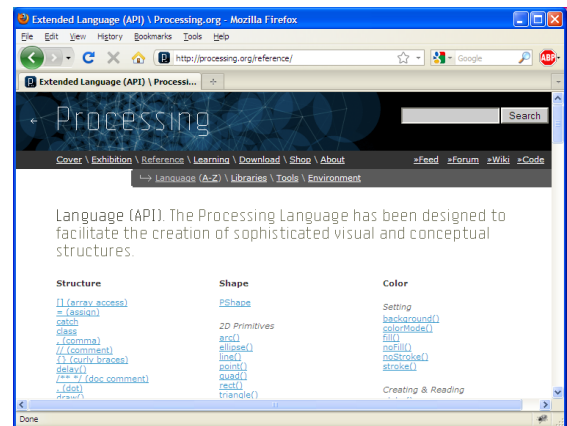

50

Primitive 2D Shapes

- point
- line
- triangle
- rect (rectangle)
- quad (quadrilateral, four-sided polygon)
- ellipse
- arc (section of an ellipse)
- curve(Catmull-Rom spline)
- bezier (Bezier curve)

52

Anatomy of a Function Call

GJK2013

53

Coordinate System

GJK2013

54

Pixels

GXK2013

55

Processing Canvas

```
size( width, height );
```

Set the size of the canvas.

```
background( [0..255] );
```

Set the background grayscale color.

GXK2013

56

Drawing Primitives

```
point( x, y );
```

```
line( x1, y1, x2, y2 );
```

```
triangle( x1, y1, x2, y2, x3, y3 );
```

```
quad( x1, y1, x2, y2, x3, y3, x4, y4 );
```

```
rect( x, y, width, height );
```

```
ellipse( x, y, width, height );
```

GXK2013

57

smooth() vs. noSmooth()

GXK2013

58

Colors

Composed of four elements:

1. Red

2. Green

3. Blue

4. Alpha (Transparency)

GXK2013

59

Why 0 .. 255?

GXK2013

60

Shape Formatting

1. Fill color
2. Line thickness
3. Line color

These are properties of your paintbrush, not of the object you are painting.

GJK2013

61

Fill Color

```
fill(gray);  
fill(gray, alpha);  
fill(red, green, blue);  
fill(red, green, blue, alpha);
```

```
noFill();
```

GJK2013

62

Stroke (Line) Color

```
stroke(gray);  
stroke(gray, alpha);  
stroke(red, green, blue);  
stroke(red, green, blue, alpha);
```

```
noStroke();
```

GJK2013

63

strokeCap()

```
smooth();  
strokeWeight(12.0);  
strokeCap(ROUND);  
line(20, 30, 80, 30);  
strokeCap(SQUARE);  
line(20, 50, 80, 50);  
strokeCap(PROJECT);  
line(20, 70, 80, 70);
```

strokeWeight()

```
smooth();  
strokeWeight(1); // Default  
line(20, 20, 80, 20);  
strokeWeight(4); // Thicker  
line(20, 40, 80, 40);  
strokeWeight(10); // Beastly  
line(20, 70, 80, 70);
```

http://processing.org/reference/strokeCap_.html
http://processing.org/reference/strokeWeight_.html

64

ellipseMode

```
ellipseMode(CENTER);  
ellipse(35, 35, 50, 50);  
ellipseMode(CORNER);  
fill(102);  
ellipse(35, 35, 50, 50);
```

rectMode

```
rectMode(CENTER);  
rect(35, 35, 50, 50);  
rectMode(CORNER);  
fill(102);  
rect(35, 35, 50, 50);
```
